14. (Currently Amended) A method for vehicle navigation comprising the steps of:
accessing a publicly accessible Web site using a computing device that is remote from
said-a vehicle;
identifying within said Web site at least one destination;
automatically determining navigation information for said destination, wherein at least a portion of said navigation information includes geographic coordinates for said destination;
storing said navigation information in a first memory, wherein said first memory is remote from said vehicle; and,
transferring said navigation information from said first memory to a self-contained, in-vehicle navigation device so that the in-vehicle navigation device is capable of independently navigating the vehicle to said at least one destination based upon the navigation information.

15. (Currently Amended) The method of claim 14, said method further comprising the steps of:
providing said first memory in a location remote from said computing device, wherein said first memory is communicatively linked to said Web site, ~~and wherein said computing device is a portable computing device.~~

16. (Previously presented) The method of claim 15, wherein said computing device is a portable computing device.

17. (Previously presented) The method of claim 16, wherein said portable computing device is a cellular device.
